

Adding a Favorites to Your Links Toolbar as an Icon Internet Explorer

Be sure your Links toolbar is showing. Go to View/Toolbars/Links and check.

Navigate to the web site you want. Then you can simply click and drag the address (URL) icon of the web site you want to add to the links toolbar and drop it on the links toolbar.

Be sure the links toolbar is unlocked if you have problems with it allowing you to drag and drop. (Right click on Links toolbar and be sure "Lock the Toolbars" is NOT selected.)
