## Putting your Contact List in your Address Book

Your Contacts should still be over on the left. To put them up at the top with your address book-

Right-click on the contacts icon over on the left, go down to properties, over to Outlook Address Book, check the box to show this folder as an e-mail Address Book, change Name of the address book to something else (like Contacts2).

Now your contacts should be in the address book at the top also (now under Contacts2 or whatever you named it). I'm still not sure how to get rid of the original Contacts name in the address book.
